

# PROTECT YOUR WORKDAY – EVERY DAY

**HAND TOOLS**  
PREPARED FOR TOOL FALL PROTECTION

**Luna**  
TOOLS

BASED ON 206 TELEPHONE INTERVIEWS WITH CRAFTSMEN  
IN SWEDEN AND NORWAY DURING JUNE 2019.  
SURVEY CARRIED OUT BY SOLVERO.

# 63%

work at height daily or weekly.

# 73%

have dropped a hand tool  
from height.

# 53%

have damaged a tool or material  
when they dropped hand tools  
from height.

# 61%

say they would secure their tools  
if there was a mounting point for  
fall protection on the tool.

## WHY PROFESSIONALS DO NOT SECURE THEIR TOOLS WHEN WORKING AT HEIGHT

BASED ON 206 TELEPHONE INTERVIEWS WITH CRAFTSMEN IN SWEDEN AND NORWAY DURING JUNE 2019. RESPONDENTS COULD CHOOSE MORE THAN ONE ANSWER.

32%	Do not know how to use tool fall protection properly
58%	Think it is time consuming to use tool fall protection
43%	Have no tools prepared for easy fall protection
65%	Feel that tool fall protection “gets in the way” when carrying out their work
11%	Believe it costs too much to use tool fall protection
45%	Never think about it

## PREPARED FOR TOOL FALL PROTECTION

THIS SYMBOL INDICATES THAT THE TOOL HAS A MOUNTING POINT FOR FALL PROTECTION

Working at height is part of everyday life for Nordic craftsmen. The majority are working on roofs, ladders and scaffolding every day or every week. We have therefore equipped all our hand tools with mounting points for tool fall protection. The mounting points are positioned to give you maximum freedom of movement

when working and are adapted for our own system for tool fall protection – Luna ZeroDrop™. When you use tool fall protection, you avoid wasting time fetching or replacing dropped tools. At the same time, you reduce the risk of accidents and expensive damage to materials.

## THREE BENEFITS OF USING TOOL FALL PROTECTION

- Fewer accidents. Falling tools can seriously injure colleagues and others.
- Less material damage. Falling tools can cause expensive damage to wooden floors, etc.
- Fewer interruptions. You avoid wasting time fetching or replacing dropped tools.

# FOR NORDIC CONDITIONS

Every Luna tool in this catalogue is made on your terms, to enable you to do your job as smartly, efficiently and safely as possible. Luna has been working with tools for over 100 years, and we are always looking for new ways to meet the needs and expectations of professional craftsmen.

Today we are one of the leaders in the industry. We know that the Nordic climate is demanding. We therefore make sure that our tools are just as useful in the cold and heat, at height and on firm ground. With a focus on quality and ease of use, we will help you protect your workday – every day.

## THREE BENEFITS OF LUNA HAND TOOLS

- Prepared for tool fall protection.
- Friction zones for a good grip in all weathers.
- Developed for and together with Nordic craftsmen.

# SAFER TOOLS WITH Luna ZeroDrop™

## THREE THINGS TO MAKE MORE PEOPLE USE TOOL FALL PROTECTION WHEN WORKING AT HEIGHT

BASED ON 206 TELEPHONE INTERVIEWS WITH CRAFTSMEN IN SWEDEN AND NORWAY DURING JUNE 2019.  
SURVEY CARRIED OUT BY SOLVERO.

**50%**

would like to see a wider  
range of fall protection  
equipment

**61%**

want mounting points  
on tools for simple fall  
protection

**53%**

want guidance on how  
to use tool fall protection

It can be time consuming to find reliable and practical ways to secure tools. We have therefore used the knowledge we have gained over a 100 years of development, production and tool use to find good solutions for working at height.

While developing Luna ZeroDrop™, we focused on producing safe and reliable solutions. We have also focused on making sure these solutions are easy to apply to our tools – while still achieving maximum freedom of movement when working.

## TOOL FALL PROTECTION IN THREE SIMPLE STEPS.

### 1. CHOOSE YOUR TOOL.

### 2. CHOOSE AN APPROPRIATE TETHERING COMPONENT.

### 3. CHOOSE A SUITABLE CORD FOR THE TASK AND ATTACH IT.

FOR MORE DETAILED GUIDES AND VIDEOS: VISIT [WWW.LUNATOOLS.COM](http://WWW.LUNATOOLS.COM)

## THINGS TO REMEMBER WHEN USING TOOL FALL PROTECTION

- Tools weighing less than 2 kg can be tethered to your body (e.g. around the wrist).
- Tools weighing more than 2 kg must be tethered to a fixed installation.
- Use steel wire when there is risk of high temperature and weld spatter, or if there are sharp objects or metal edges.
- Always check the condition of your gear before each use.

## LUNA CARPENTER'S HAMMERS

We sold our first hammer in 1917. Since then we have continuously developed our hammer range together with Nordic craftsmen. The grip on our hammers has been designed to fit perfectly in your hand, and to work perfectly in all seasons. The material selection and design create a firm grip, even when in rain and freezing temperatures. All our hammers are prepared for tool fall protection.

# FULLY FORGED HAMMERS

## FULLY FORGED HAMMER L-EVO

- Carpenter's hammer forged in one piece
- Advanced design provides greater impact in relation to weight
- Design reduces vibrations between face and handle
- Magnetic nail holder
- Curved, extra thin ground claw allows you to easily grip under nails or mouldings
- Ergonomic handle with special rubber for a good grip and comfort whatever the weather
- End stop with hole for tool fall protection

## FULLY FORGED HAMMER LF

- Carpenter's hammer forged in one piece in a flexible design
- Curved thin ground claw allows you to easily grip under nails or mouldings
- Ergonomic handle with special rubber for a good grip and comfort whatever the weather
- Heavy duty end stop reduces risk of dropping the hammer
- Hole for tool fall protection

## FULLY FORGED HAMMER LFN

- Carpenter's hammer forged in one piece in a flexible design
- Head with magnetic nail holder
- Curved thin ground claw allows you to easily grip under nails or mouldings
- Ergonomic handle with special rubber for a good grip and comfort whatever the weather
- Heavy duty end stop reduces risk of dropping the hammer
- Hole for tool fall protection

## LUNA STRIKING TOOLS

Luna's wide range of striking tools is perfectly adapted to the needs of carpenters, sheet metal workers, ventilation fitters and caretakers. And many other professional groups. Material selection and detailed machining of striking faces are key features of this range. Friction zones on the handles provide a better grip in damp weather conditions. All our striking tools are prepared for tool fall protection and can be secured easily with several types of tether.

# STONING HAMMERS

## STONING HAMMER HICKORY LSHH

- Stoning hammer with smooth ground striking faces
- Handle made of environmental class hickory
- Friction zone on handle for a good grip whatever the weather
- Hole for tool fall protection

## STONING HAMMER FIBREGLASS LSHG

- Stoning hammer with smooth ground striking faces
- Fibreglass handle adapted for tough jobs and high stress
- Special rubber in the handle for a good grip whatever the weather
- Hole for tool fall protection

## LUNA MEASURING TAPES

Luna measuring tapes have been developed for tough jobs in a Nordic climate. All 3-, 5-, 5.5- and 8-metre measuring tapes have the highest tolerance class for accurate measurements. The tapes feature heavy duty protective coatings for reduced wear under regular, tough use. An additional measurement scale on the underside of the tape displays every 30 cm, 45 cm and 60 cm, for easy positioning of studs, etc. All our measuring tapes are prepared for tool fall protection and can be secured easily with several types of tether.

# MEASURING TAPES – AUTO LOCK

## MEASURING TAPE LAL

- Tolerance class 1
- Auto lock function where the tape locks automatically in the desired position
- Developed to withstand all weather conditions with casing made of impact and cold resistant ABS plastic
- Steel tape with double nylon coating on a yellow, non-reflective surface for maximum visibility and high wear resistance
- CC 30/45/60 measurements on the back of the tape for easy study positioning
- Straight rear edge for internal measuring
- Tool fall protection inside the casing

## MEASURING TAPE LAL WITH MAGNETIC END HOOK

- Tolerance class 1
- Auto lock function locks the tape automatically in the desired position
- Magnetic end hook
- Developed to withstand all weather conditions with casing made of impact and cold resistant ABS plastic
- Steel tape with double nylon coating on a yellow, non-reflective surface for maximum visibility and high wear resistance
- CC 30/45/60 measurements on the back of the tape for easy study positioning
- Straight rear edge for internal measuring
- Tool fall protection inside the casing

# MEASURING TAPES – PUSH LOCK

## MEASURING TAPE LPL

- Tolerance class 1
- Push lock function makes the tape easy to use, even when wearing winter gloves
- Enclosed casing made of impact and cold resistant ABS plastic
- Steel tape with double nylon coating on a yellow, non-reflective surface for maximum visibility and high wear resistance
- CC 30/45/60 measurements on the back of the tape for easy study positioning
- Straight rear edge for internal measuring
- Tool fall protection via the hole in the belt clip

## MEASURING TAPE LPL WITH MAGNETIC END HOOK

- Tolerance class 1
- With magnetic end hook
- Push lock function makes the tape easy to use, even when wearing winter gloves
- Enclosed casing made of impact and cold resistant ABS plastic
- Steel tape with double nylon coating on a yellow, non-reflective surface for maximum visibility and high wear resistance
- CC 30/45/60 measurements on the back of the tape for easy study positioning
- Straight rear edge for internal measuring
- Tool fall protection via the hole in the belt clip

## MEASURING TAPE LSS STAINLESS

- Stainless tape in tolerance class 1
- Specially developed for demanding, damp/corrosive environments
- Push lock function makes the tape easy to use, even when wearing winter gloves
- Enclosed casing made of impact and cold resistant ABS plastic
- CC 30/45/60 measurements on the back of the tape for easy study positioning
- Tool fall protection via the hole in the belt clip

## LONG TAPES – ENCLOSED CASING

### MEASURING TAPE LS STEEL

- Steel measuring tape with enclosed casing made of impact and cold resistant ABS plastic
- Rubber components for increased comfort and grip
- Double nylon coating on a yellow, matt surface for maximum visibility and wear resistance
- Resistant to water, gravel, dust and most chemicals
- Retractable crank with 3:1 gear for quick return
- End hook with both ring and hook
- Tool fall protection in the casing

### MEASURING TAPE LG FIBREGLOSS

- Fibreglass measuring tape with enclosed casing made of impact and cold resistant ABS plastic
- Heavy duty fibreglass tape with double surface coating, perfect for tough and damp environments. Does not conduct electricity
- Rubber components for increased comfort and grip
- Retractable crank with 3:1 gear for quick return
- End hook with both ring and hook
- Tool fall protection in the casing

## LUNA UTILITY AND SNAP-OFF BLADE KNIVES

Luna universal and snap-off blade knives have been developed to cut through different types of demanding materials. The knives are therefore supplied with SK2H blades, which feature extreme sharpness and durability. We also have models with an automatic, retractable blade for increased safety when in use. All of our knives are prepared for tool fall protection.

# SNAP-OFF BLADE KNIVES

## SNAP-OFF BLADE KNIFE COMB ZINC

- Double blade function
- The front button pushes forward the blade and has an automatic return spring
- The rear button pushes forward the blade to the desired protruding length
- Rubberised surfaces for a good grip in all weathers
- The rear plastic cover can be detached and used as a snap-off tool for the new blade
- Hole for tool fall protection

## SNAP-OFF BLADE KNIFE COMB PLASTIC

- Double blade function
- The front button pushes forward the blade and has an automatic return spring
- The rear button pushes forward the blade to the desired protruding length
- Rubberised surfaces for a good grip in all weathers
- The rear plastic cover can be detached and used as a snap-off tool for the new blade
- Hole for tool fall protection

## SNAP-OFF BLADE KNIFE ALU

- Simple, flexible aluminium knife
- Rubberised surfaces for a good grip in all weathers
- The rear plastic cover can be detached and used as a snap-off tool for the new blade
- Hole for tool fall protection

## SNAP-OFF BLADE KNIFE PLASTIC

- Flexible knife for simple jobs
- Rubberised surfaces for a good grip in all weathers
- The rear plastic cover can be detached and used as a snap-off tool for the new blade
- Hole for tool fall protection

## SNAP-OFF BLADE KNIFE MATT HOOK

- Robust knife with permanent matt hook
- The rear plastic cover can be detached and used as a snap-off tool for the new blade
- Hole for tool fall protection

## UTILITY KNIVES

### UTILITY KNIFE LUK-30TB

- Heavy duty knife with dual blades and controls for hook blades or straight, plain blades
- Rubberised surfaces for a good grip in all weathers
- Blade magazine in handle
- Hole for tool fall protection

### UTILITY KNIFE LUK-80

- Knife for demanding use and tough jobs
- Blade control on the side keeps the top side free for maximum cutting pressure
- Blade magazine in handle with screw lock
- Hole for tool fall protection

---

# UTILITY KNIVES

## UTILITY KNIFE MULTIFUNCTION FOLDING

- Folding knife for minimum size
- Blade has a heavy duty locking button
- Blade magazine in handle
- Hole for tool fall protection

## UTILITY KNIFE LUK-92

- Simple, flexible model
- Blade magazine in handle with screw lock
- Hole for tool fall protection

## UTILITY KNIFE LUK-40Q

- Hand guard for increased safety
- Rubberised surfaces for a good grip in all weathers
- Blade magazine in handle
- Tool fall protection via the safety handle

## UTILITY KNIFE LUK-20FS

- Heavy duty safety model with two choices for extending the blade: fixed locking or spring loaded return (safety knife)
- Guide for quick cutting of tape/string
- Rubberised surfaces for a good grip in all weathers
- Blade magazine in handle
- Hole for tool fall protection

## UTILITY KNIFE LUK-60S

- Lightweight safety model for simple jobs
- With spring loaded blade return
- Rubberised surfaces for a good grip in all weathers
- Guide for quick cutting of tape/string
- Hole for tool fall protection

# UTILITY KNIVES

## UTILITY KNIFE LUK-90

- Traditional, lightweight model with rubberised surfaces for a good grip in all weathers
- Guide for quick cutting of tape/string
- Blade magazine in handle
- Hole for tool fall protection

## LUNA AXES

Luna has a wide range of axes from small axes, perfect for finely chopping wood, to larger axes for tree felling and coarse splitting. Handles are available in both hickory and fibreglass, with friction zones for a better grip in damp weather conditions. The curved design of the handle provides good support and power in all situations. The axe edge is precision hardened to ensure high durability and long intervals between regrinding. All axes are prepared for tool fall protection. All our axes are supplied with heavy duty leather edge guards.

# UNIVERSAL AXES

## OUTDOOR AXE LUA

- Universal axe in classic Nordic form and design
- Forged head in several stages provides high quality and good sharpness
- Curved handle made of environmental class hickory
- Friction zone on handle for a good grip in all weathers
- Heavy duty leather edge guard
- Hole for tool fall protection

## LUNA HAND SAWS

Luna hand saws are available in different designs to meet different requirements. Our saws are characterised by heavy duty, two-component handles and high quality material selection and tooth hardening. Tool fall protection via the handle.

# HAND SAWS

## HAND SAW CHAMPION (S400, S500, S550)

- 3-phase grinded hand saw with hardened teeth
- With friction coated saw blade
- Two-component handle – designed as an angle stop at 90° and 45° to the back of the saw blade
- The saw has a sloping tip to enable it to better cut through the middle of the material
- Tool fall protection via the handle

## HAND SAW PREMIUM (400, 500, 550)

- 3-phase grinded hand saw with hardened teeth
- Coated saw blade
- Two-component handle – designed as an angle stop at 90° and 45° to the back of the saw blade
- The saw has a sloping tip to enable it to better cut through the middle of the material
- Tool fall protection via the handle

## HAND SAW PREMIUM – UNIVERSAL TOOTH GRIND (500)

- Universal tooth grind, hardened tooth points
- Coated saw blade
- Two-component handle – designed as an angle stop at 90° and 45° to the back of the saw blade
- The saw has a sloping tip to enable it to better cut through the middle of the material
- Tool fall protection via the handle

## HAND SAW CLASSIC (A550)

- Universal tooth grind, hardened tooth points
- Coated saw blade
- Single-component handle – designed as an angle stop at 90° and 45° to the back of the saw blade
- The saw has a sloping tip to enable it to better cut through the middle of the material
- Tool fall protection via the handle

## BACK SAW

- Extra fine teeth for fine cuts
- Universal tooth grind, hardened tooth points
- Coated saw blade
- Two-component handle
- Tool fall protection via the handle

# HAND SAWS

## VENEER SAW

- Extra fine teeth for fine cuts
- Even the curved upper section of the saw blade is toothed
- Universal tooth grind, hardened tooth points
- Coated saw blade
- Two-component handle
- Tool fall protection via the handle

## JAPANESE STYLE PULL SAW

- Joiners saw with soft, flexible saw blade
- Rubber grip handle
- Saws with a pull action
- Hole for tool fall protection

## JIGSAW

- Universal tooth grind, hardened tooth points
- Coated saw blade
- Two-component handle
- Hole for tool fall protection

# BOW SAWS AND LIGHTWEIGHT CONCRETE SAWS

## BOW SAW

- Oval steel bow with quick blade clamping
- Handle fitted with knuckle guard
- Supplied with saw blade
- Tool fall protection via the handle

## BOW SAW FOR FOOD

- Adapted for cutting up frozen food items
- Oval, chrome plated steel bow with quick blade clamping
- Handle fitted with knuckle guard
- Supplied with saw blade
- Tool fall protection via the handle

## HAND SAW FOR LIGHTWEIGHT CONCRETE

- Designed for sawing through building stone and building blocks
- Suitable for all types of lightweight concrete
- Two-component handle with soft ergonomic grip
- Tool fall protection via the handle

## LUNA CLAMPS

Luna's range of clamps includes both one-hand clamps and screw clamps. Our models are designed for flexibility and durability. With a focus on providing a firm grip and easy handling. Our clamps are prepared for tool fall protection via a hole in the guide rail.

# CLAMPS

## ONE-HAND CLAMP

- One-hand clamp with quick setting
- Steel guide rail
- Pressure plate with plastic cover
- The fixed jaw is reversible for internal clamping and outward straining
- Clamping force 150 kg
- Hole for tool fall protection

## SCREW CLAMP

- Made of malleable cast iron
- Guide rail made of zinc plated steel
- Heavy duty square-threaded, bronzed screw with plastic-coated, ball-jointed pressure plate
- With two-component handle
- Hole for tool fall protection

## WRECKING BARS AND PRY BARS

Luna Tools wrecking bars and pry bars are created to meet the craftman's demand on power, durability and agility. The range of wrecking bars include products that are specially designed for easier access between different materials, and which have ends with wide area that reduces the risk of damage and marks. Our pry bars are by their design well balanced for maximal power. All our wrecking bars and pry bars are prepared for tool fall protection.

# WRECKING BAR

## WRECKING BAR MADE OF HIGH ALLOY OCTAGONAL CHROME VANADIUM STEEL

- Wrecking bar made of high alloy octagonal chrome vanadium steel
- Thin, ground surfaces on both claws and a chisel end to facilitate breaking and nail extraction
- Wide design at both ends to better spread the pressure on the foundation
- Supplied complete with fixing components for tool fall protection AISI 316

## TOOL FALL PROTECTION

It can be time consuming and difficult to find the right type of fall protection product for hand tools. We have used our 100 years in the industry to develop practical solutions for working at height. Luna's range has been designed for easy tool fall protection, whatever job you are performing.

---

## FOR TOOLS UP TO 2 KG

### WRIST BAND WITH VELCRO

- Wrist band with Velcro and cord loop
- Easy Velcro fastening around the wrist
- Short cord has minimal impact on your freedom of movement when working

### WRIST BAND WITH VELCRO AND SWIVEL HOOK

- Elastic lanyard with energy dampening function
- Easy Velcro fastening around the wrist
- Short lanyard has minimal impact on your freedom of movement when working
- Twist lock swivel snap hook made of aluminum

### SPIRAL WIRE COATED

- Spiral wire made of stainless steel (AISI 304) with plastic cover
- Stainless steel (AISI 304) snap hooks with screw locks

### RETRACTABLE LANYARD

- Retractable lanyard with plastic coated stainless steel (AISI 304) wire
- Stainless swivel at the end

---

## FOR TOOLS UP TO 4 KG

### LANYARD ELASTIC 2 CARABINER

- Elastic lanyard with energy dampening function
- Twist lock swivel snap hooks made of aluminum at both ends

### LANYARD ELASTIC WITH CORD LOOP

- Elastic lanyard with energy dampening function
- Twist lock aluminum swivel snap hook at one end and cord with loop at the other end

### LANYARD ELASTIC 3 CARABINERS

- Double elastic lanyard with energy dampening function
- Twist lock aluminum swivel snap hooks at all ends

## FOR TOOLS UP TO 4 KG

### WIRE WITH CARABINERS

- Wire with lockable snap hooks at both ends
- Acid-proof steel 316 for demanding corrosive environments
- Suitable for use with sharp edges or where there is a risk of weld spatter, etc.

## FOR TOOLS OVER 4 KG

### STRAP FOR HEAVIER TOOLS

- Strap for securing tools to fixed installations
- Intended for heavier tools or machinery
- Galvanised D-ring and loop
- Not for attachment to the body

### STRAP FOR HEAVIER TOOLS WITH SNAP HOOK

- Strap for securing tools to fixed installations
- With fitted snap hook and loop at the other end
- Intended for heavier tools or machinery

### WIRE FOR HEAVIER TOOLS WITH SNAP HOOKS

- Stainless steel 316 wire
- With loop and lockable snap hook at both ends

### ELASTIC STRAP WITH LOOP AND SNAP HOOK

- Polyester strap with elastic energy dampening function
- Noose at one end and lockable snap hook made of stainless steel (AISI 304), hook opening 10 mm
